## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-86 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 1-86 are allowed because a comprehensive search of prior art failed to teach, as applicant has, a sync mark detector for identifying a sync mark in an incoming bitstream of a communications channel comprising a bit comparing circuit that compares the sync mark bit by bit to the incoming bitstream in a first coding domain if channel irregularities do not exist; and a symbol comparing circuit that compares the sync mark symbol by symbol to the incoming bitstream in a second coding domain that is different than said first coding domain if channel irregularities do exist. The closest reference Simmons (US 2002/0094048) found teaches comparing the sync mark bit-by-bit to the incoming stream if channel irregularities do not exist and comparing the sync mark frame by frame to the incoming stream if channel do exist (Par. 35-38). But fails to teach a bit comparing circuit that compares the sync mark bit by bit to the incoming bitstream in a first coding domain if channel irregularities do not exist; and a symbol comparing circuit that compares the sync mark symbol by symbol to the incoming bitstream in a second coding domain that is different than said first coding domain if channel irregularities do exist.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
